Experience

○ 2018 - 2019

Philippine Information Agency | Laoag City

Practicum

I designed and edited videos and images for social media, significantly enhancing online engagement for their social media page I stayed updated with industry trends and design tools, consistently delivering innovative designs. I also effectively addressed hardware and software problems, leveraging my expertise to provide swift and efficient solutions.

○ 2022 - 2023

Department of Information and Communications Technology

| Laoag City

On - The -Job - Training

During my time, I made significant contributions to web development projects and multimedia design at DICT. I played an active role in creating a web-based system, with a primary focus on improving user interface (UI) and functionality. Leveraging my skills in HTML, CSS, and JavaScript, I crafted visually appealing and responsive web pages. Additionally, I was responsible for designing posters and multimedia materials for marketing campaigns and also effectively addressed hardware and software problems. I provided creative input and played a key role in problem-solving efforts. Through my dedication and efforts, I consistently completed assigned tasks that are given to me.

Academic Projects

- Gonav: realtime campus navigation android based application
- Qr Attendance And MONitoring System for BJMP - Batac District Jail
- Qr code inventory Management for DICT laoag
